

## **Curnow**School

### **Behaviour, Wellbeing and Relationship Policy**

At Curnow School our Behaviour, Wellbeing and Relationship Policy reflects our understanding of the complex needs of all our learners. and how this can affect their wellbeing, ability to self – regulate and manage their behaviour positively in order to engage with their learning.

We aim to take a holistic, whole person approach to behaviour that encompasses; the curriculum and in particular PSHE/RSE, the child centred Education, Health and Care plan, sensory processing, trauma informed approaches, positive behaviour strategies and appropriate environments. All pupils have access to this holistic offer. (Appendix 1)

At Curnow School we endeavour to build relationships founded upon mutual trust, care and respect with all members of the school community. We want all learners to be proud of belonging to our special school family, for young people to feel safe at school, to develop meaningful relationships, make positive behaviour choices and learn how to self –regulate their emotions and feelings. This policy will commit to educational practices, which Protect, Relate, Regulate and Reflect for all.

#### **Aims**

At Curnow School, we have high expectations for all our learners in terms of their ability to learn and every day is viewed as an opportunity to extend experiences, knowledge and skills. However, for some pupils the biggest barriers to achieving this will be their wellbeing needs and ability to self regulate which impacts on their ability to engage within their learning. Access to the curriculum can be severely hindered for a learner who is emotionally dysregulated. It follows, therefore, that a happy and emotionally regulated learner is more inclined to make progress due to their readiness to learn and engage. We aim to:

- To provide a supportive setting in which learners feel secure and where good behaviour and effort are celebrated.
- To ensure our curriculum engages pupils within their learning and supports where necessary through informed, targeted approaches.

- To celebrate all positive behaviours and achievements in line with our PARRCS Policy and the Curnow Code (Appendix 2).
- To embed strong working relationships with parents and carers to ensure the best outcomes for learners.
- To provide strategies which encourage learners to communicate their feelings in more appropriate ways.
- To ensure that our school environment is calm and informed which improves the quality learning.
- For the learners to develop an awareness and consideration of others.
- To underpin the SPT offer within Spiritual, Moral, Social and Cultural education and through the informed delivery of Promoting British Values.
- To provide consistency of approach to dealing with positive behaviour support through staff training. A large number of our staff have undertaken Team Teach training. We also have school based staff who are trained to deliver Team Teach Training within the SPT.
- To provide a means of systematically recording data associated with positive behaviour management adopted across the SPT and in using this data to inform strategies and support to meet the needs of pupils through an informed approach.
- To provide a means of securing data associated with positive behaviour management strategies adopted across the SPT, using this to accurately report to Governors/Trustees each term for their scrutiny and challenge.
- To provide a means for multi-agency support for our schools, parents and learners with respect to complex behaviour particularly in relation to be-spoke provision which may include for example sensory profiling or specific diets which informs practice.
- To determine the most suitable learning environment and to make reasonable adjustments for any learner within a school following close consultation with parents and carers and multi-agency professionals.
- To ensure the safety of all learners/staff within the school.
- To ensure the school remains compliant within its statutory duty under Section 175 or 157 of the Education Act 2002 for safeguarding in promoting the welfare of children.

## **Trauma Informed Approach**

Curnow Schools aim is to fully understand the learners past life experiences, triggers that affect their lives, emotional situations that they find challenging to self-regulate in and support them through this. We will implement strategies guided by our specialist Trauma and Mental Health Informed Practitioners to support learners who are identified as requiring this additional support. Research suggests that children and young people with Severe Learning Disabilities are more likely to experience a Mental Health need. Our aim is to identify these needs quickly, support the learners in making sense of their experiences, manage emotions and feelings and ensure they maintain the capacity to build relationships despite these difficult events that may have happened to them. Due to the provision Curnow offers, the varying age of learners and their differing needs, we look to use a Trauma Informed style language and approach to support learners through the school day. This will underpin all communication and interactions that staff have with learners across the school will naturally understand the impact of trauma, past and present, on our learners lives. A Trauma Informed Approach acknowledges evidence-based research within health and the neurosciences that demonstrate a clear correlation between the adversities a learner experiences in childhood and its potentially damaging effects on their later physical health, emotional health and social outcomes.

Trauma-informed practice is not designed to treat trauma related difficulties. Instead, it seeks to address the barriers that those affected by trauma can experience when accessing education. Our Trauma Informed approach will be delivered through staff interactions that are based on the Protect/Relate/Regulate/Reflect model and will be supported by using the PACE approach - Play Acceptance Curiosity Empathy. Our Trauma Informed approach identifies a way of relating to pupils that support them to feel safe, this can reduce the need for pupils to enter the fight or flight mode therefore supporting a reduction in anxiety within school.

### **PACE**

- Play – Playfulness, light, open, hopeful and spontaneous.
- Acceptance – Unconditionally accepting of all of the experiences of the learners, so they trust staff not to be judgmental.
- Curiosity – Non-judgmental active interest in how learners experience what happens to them in their lives.

- Empathy – Felt sense of the pupil’s feelings and needs which is actively communicated to the pupils.

### **Protect:**

- Ensure that all students are greeted warmly in all areas of the school.
- Staff trained in ‘PACE’ modes of interaction: warm, empathetic, playful and curious (proven to shift children out of flight/fright/freeze positions).
- Staff ensure that interactions with children are socially engaging, warm and inviting.
- Focused interventions that help staff to get to know learners better on an individual basis. These relationships are key to enabling children to feel safe whilst in school ensuring all learners have access to an emotionally available adult.
- School staff adjust expectations around all learners to correspond with their developmental capabilities and experience of traumatic stress. This includes removing traumatised learners away from situations they are not managing well, providing a calmer, smaller area with emotionally available regulated adult.
- Staff to provide a voice for our learners and advocate on their behalf.

### **Relate**

- A whole-school commitment to enabling children to see themselves, their relationships and the world positively.
- Provide learners with repeated relational opportunities (with emotionally available adults) to make the shift from ‘blocked trust’ (not feeling psychologically safe with anyone) to trust, and from self-help to ‘help seeking’.
- Staff trained in empathic and playful modes of interaction. Each class to have a nominated TIS Warrior to ensure good practice is consistent in all classrooms.
- Relating with the learner we can show we are listening and seeing their feelings, supporting and recognising the emotions they are experiencing.

## **Regulate**

- Relational interventions specifically designed to bring down stress hormone levels (e.g. from toxic to tolerable) following the Motional Snapshot activities and in class experiences enabling them to feel calm, soothed and safe. This is to support learning, quality of life and protect against stress-induced physical and mental illness, now and in later life.
- Evidence-based interventions that aim to repair psychological damage caused by traumatic life experiences, through emotionally regulating, playful, enriched adult-learner interactions.
- The emotional well-being and regulating of staff is treated as a priority to prevent burnt out and stress related absence, debrief sessions are in place to support post incident.

## **Reflect**

- Staff are trained in the art of good listening, dialogue, empathy and understanding.
- Time to reflect post incident, to talk about alternatives to their behaviours while still acknowledging the emotion behind them. You can reassure them that you care about them but the behaviour they are exhibiting is not acceptable.
- Provide learners with other options, give choices. If you feel like this again you can.....
- Provide time to discuss events and situations, this can be done through a social story, books or story sack.
- Discuss feelings within the classroom as a daily experience. Talk about experiences others have had.
- Identify how it feels to be calm/relaxed, provide learners with opportunities and reflect on the differences they may feel in these moments. .
- Avoid putting the learner back in the same situation and reliving a trauma. What can I do differently?
- Staff to reflect on what was the learner trying to tell me in that moment, what is the behaviour telling me?

## **Responses from staff**

**Affect Attunement** – Meet the learner's emotional intensity (positive or negative) on an energetic level, to connect with the pupil in their pain or joy.

Mirroring the same level of energy to build a connection around the trauma and help the pupil understand the feelings and emotion. The pupil will hopefully see this as positive connection with staff helping to build the trusting and emotional available relationship.

**Empathy** – Recognition of how the learner is experiencing the event, even if this is very different to how you are experiencing it. Staff won't dismiss the feeling, they will help affirm, understand and recognise what the learner is feeling.

**Containment** – Staff will be able to be in the moment with a learner's intense feelings without absorbing the emotion and acting upon it. At times this will mean being able to bear the learners pain. Containment is also supported through clear structures to the day, boundaries and actions that are followed through on.

**Emotional Regulation** – Bringing down toxic stress to tolerable stress and the moving to states of calm. Soothing and calming the learner's emotional dysregulated state, will over time, develop effective stress regulating systems in the brain and a more positive feeling through the learner's body. This can be done through calming conversations, timeout and sensory support/items but in each case will be bespoke to the learner in question.

**Use of Voice and Body Language** – In most cases, staff will use a calm and lowered tone of voice when managing behaviour to communicate calmness, safety and empathy to a learner. All staff ensure that their body language is always open and non-confrontational.

**De-escalation strategies** – Staff are trained in a range of de-escalation strategies through Team Teach. These include – distraction, re-direction, change of face, use of humour, offering reflection or calming space and time 95%. Only 5% or less requires physical Interventions (Prompts, Guides, Escorts and Restraints). The de-escalation strategies that work for a pupil will be written into their behaviour and wellbeing plan and their behaviour risk assessment so that staff can support in an informed way.

**Motional Profiling** – To support learners, who are identified, a Motional Comprehensive Snapshot can be created. This provides key staff to have an understanding of areas where support and development are needed, optional activities are also provided. These profiles will be created by staff teams,

including parents, working with that particular learner and will also be supported by the Pastoral and Behaviour Lead.

### **Terminology that's accepted at Curnow:**

- Dysregulated
- Unsettled
- Emotional
- Distressed
- Displaying behaviours that are challenging
- Unhappy
- Anxious

### **Motivators and Consequences**

The reinforcing of appropriate behaviours is an essential component in the learning process and enables the development of skills in all areas of a young person's life. Rewards or motivators are those that are given to a learner after he/she has behaved in a way that gains an adult's approval. At Curnow, rewards are likely to take the form of either an object (e.g. iPad) or an experience (e.g. getting a certificate) and are based on the individual preferences of each individual young person. The practice of removing stars or rewards that have already been earned bears a strong resemblance to punishment, and is therefore incompatible with Curnow's' stance on Positive Behaviour Support. It is not acceptable practise for rewards to be revoked or rewards to be used to stop negative behaviours as this will be seen as a 'bribe'.

At Curnow School we do not believe in sanctions or punishments, but we do believe that it is important for our children and young people to clearly link a specific behaviour with its consequences. Therefore, the consequences we use are linked to the presented behaviour's function and make sense to the young person. For example, if a young person presents with a behaviour of concern because he/she is trying to avoid a demand the adults would wait until the young person is calm and will reinstate the demand. At the same time, consideration will be given on the reason the young person is reluctant to follow this demand and appropriate proactive strategies will be implemented in order to reduce the likelihood of this happening again. In addition, the class team will focus on teaching the young person appropriate functional skills that will enable the young person to achieve the same outcome without having to

use a behaviour of concern. The consequences may vary for different pupils in line with their individual needs and the function of their behaviour.

Consequences for behaviours of concern will only be used with students who are at a stage emotionally where they can exercise some control or choice over their behaviour. It is not appropriate to hold a student to account for their behaviour, by implementing a consequence, when they are at an emotional development stage where they operate from the reptilian brain or brainstem when they experience heightened emotions and revert to fight/flight or freeze at these times.

### **Behaviour Support**

At Curnow School we define behaviours of concern as any behaviour which:

- Reduces the quality of an individual's life.
- Reduces access to learning.
- Puts a child or young person at risk (physically or emotionally).
- Puts the people around a child or young person at risk (physically or emotionally).

### **Behaviours of concern may show that:**

- The child or young person has needs or wants which they are not able to communicate through other means.
- The child or young person's medical needs are not being met – they may feel ill or in pain.
- The child or young person is experiencing demands, which are too much for them.
- The child or young person is experiencing feelings such as frustration, anxiety, depression or anger.
- The child or young person is overwhelmed by their environment or others around them.
- The child or young person needs more help to understand what is expected of them.

Low-level disruption is addressed quickly to ensure learners' behaviours do not disrupt lessons or the day-to-day life of the school. If bullying, aggression, discrimination and derogatory language occur, they are dealt with quickly and effectively. In judging whether a particular behaviour is a cause for concern adults consider the child or young person's age and level of development. The

behaviours of concern displayed by pupils at Curnow typically fall within the following categories: self-targeted behaviours, harm to others and damage to property. Behaviours of concern are categorised into three levels. If a learner presents with a Level Three behaviour or is persistently presenting with Level One or Level Two behaviours a Well-being Plan and an Behaviour Risk Assessment written (Appendix 3). Well-being Plans are individually tailored behaviour plans which outline proactive strategies, in addition to teaching contextually appropriate skills, developing communication systems and suggestions on modifying the environment to support the young person to learn the necessary skills that will enable them to self-regulate and manage their own behaviour. By colour coding the Well-Being Plans we show the different stages of the behaviour as an individual's behaviour moves between. All staff are expected to follow the strategies mentioned in the learners' Well-being Plan consistently in order to support the learners when moving between the different stages of behaviour safely and effectively.

All Well-being plans and Behaviour Risk Assessments have been shared with and agreed and signed by parents/carers. Individual Risk Assessment are reviewed yearly across the school but given that they are 'live' document, the class teachers in consultation with the Pastoral and Behavioural lead must regularly update them if the behaviours presented change/evolve to ensure a consistent, pro-active approach.

### **Dynamic risk assessments**

Whilst we will always endeavour to work in a proactive and informed way to support pupils behaviour and wellbeing there may be circumstances that require staff to act reactively to an incident through a dynamic risk assessment of a situation. In this circumstance staff are acting upon their 'duty of care' to keep a child or young person safe by acting in the 'best interest' of the child or young person. If this occurs, the incident will need to be recorded and a wellbeing plan and risk assessment written or updated to ensure in the future there is a planned and proactive response to the behaviour.

### **Team Teach**

Staff at Curnow School receive Team Teach training to ensure that there are enough qualified and competent staff within classes to support pupils through positive behaviour management with the emphasis on de-escalation, positive handling and restraint reduction.

Staff are trained by Intermediate Team teach trainers within the SPT who have a wealth of experience and understanding of the pupils needs, the team teach approach the school environment. Curnow School holds a record of the staff that have received the Intermediate level training and whose certification is in date and current. A training programme is in place to ensure staff current and competent within their Team Teach qualification.

New staff, depending upon the need of the class will be trained at the earliest opportunity to ensure that they have the skills, understanding and competence to support the pupils effectively.

### **Recording of behaviour**

At Curnow School we use Trackit-Lights and Cpoms (Appendix 4) to record Level 2 and 3 behaviours and associated responses which may include Restrictive Physical interventions (RPI).

Trackit-Lights is used within each class to record Level 2 and 3 behaviours by the class team as well as recording positive behaviour linked to the Curnow Code. Members of the SLT are able to monitor these behaviours and will be alerted to any level 3 behaviours (see appendix). Level 3 behaviours will also be linked to the Cpoms system and the DSL and DDSL will be informed and alerted.

Any Level 3 incidents will be followed up with a **Post incident debrief** (Appendix 6) and this will include post incident support and post incident learning. **Post incident support** will focus on the immediate physical and emotional wellbeing of all involved in the distressed episode, with the aim of checking that people are safe and able to recover. **Post Incident learning** will focus on and learn about what caused the distress and how to prevent it in the future. Pupils will be supported through a personalised approach taking into account their needs, level of understanding and preferred communication method to ensure that the process does not increase stress or anxiety. We always ensure that actions are put in place to support the pupil and staff to reduce risk, reduce restraint and provide strategies for the pupil to manage their own behaviour in a more socially acceptable way.

### **Monitoring pupil behaviour**

All level 2 and 3 behaviours, recorded through Trackit Lights and Cpoms are reviewed and monitored through our fortnightly safeguarding meetings. The

Senior Leadership Team (SLT), Designated safeguarding Lead (DSL) and the family Liaison worker monitor these incidents and track any trends over time. Where necessary and through the incident debrief process, these incidents are reviewed and any actions, changes to support, or new support will be added to the pupils Well-being plan and/or risk assessment. Where necessary or identified staff wellbeing is supported through class team meetings and any actions addressed to support staff, their safety and wellbeing. Where additional support maybe needed, the behaviour lead/SLT meet with the Specialist Intervention Therapist (SIT) each half term or, as and when necessary to ensure additional support such as an Occupational Therapist (OT) or a referral to CAMHS can be actioned as the earliest opportunity where this support is needed.

### **Pupil Voice**

It is important the pupil voice is part of any post incident debrief and that this is recorded within the incident report (Trackit Lights/Cpoms). Resources used to support post incident support and learning will be personalised to ensure that all pupils have a 'voice' and that post incident learning provides strategies and support to reduce the incident and/or severity of the incident in the future as well as reducing risk and restraint.

### **Anti-Bullying Statement**

At Curnow School, we are committed to providing a safe, inclusive, and respectful environment for all students, staff, and visitors. Bullying in any form—whether physical, verbal, emotional, or cyber—is unacceptable and will not be tolerated.

**Definition of Bullying:** Bullying is defined as repeated, intentional behaviour that causes physical or emotional harm to another person. This can include, but is not limited to:

Physical aggression (hitting, kicking, pushing)

Verbal abuse (name-calling, teasing, threats)

Social exclusion (spreading rumours, encouraging others to exclude someone)

Cyberbullying (sending harmful messages or images via electronic means)

Many of our pupils may not understand the implications of bullying, or know what bullying is and how their actions can be interpreted as bullying. It is

therefore important that staff are very aware of the terminology and are able to identify, report and support a pupil whom may be being bullied within school. We also recognise that we will need to support the perpetrator as well as the victim, to support their understanding and to develop strategies and behaviours that do not impact on others in a negative way. We will work with other professionals, if necessary to ensure that the support and learning is appropriate to the needs and ability of the pupils involved.

### **Our Commitment:**

**Prevention:** We will educate our students about the impact of bullying and promote a culture of kindness and respect through regular assemblies, classroom activities and learning, and school-wide initiatives.

**Reporting:** We encourage students, staff, and parents to report any incidents of bullying. Reports can be made anonymously if preferred. Staff to use Cpoms to report any incidents of bullying. These will be read and any actions identified by the DSL/DDSL and/or SLT of the school.

**Response:** All reports of bullying will be taken seriously and investigated promptly. Appropriate actions will be taken to support the victim and address the behaviour of the bully.

**Support:** We will provide support to those affected by bullying, including counselling services and peer support programs, if necessary.

### **Responsibilities:**

**Students:** Treat others with respect and report any bullying incidents to a trusted adult.

**Staff:** Model respectful behaviour, intervene in bullying situations, and support students in reporting incidents.

**Parents:** Encourage respectful behaviour at home and communicate with the school if they suspect their child is involved in bullying.

Together, we can create a safe and supportive environment where everyone feels valued and respected.

### Our School Philosophy 'The Curnow Code'

At Curnow we are all aiming ....

- To be kind and thoughtful to others
- To look after the school and everything in it
- To always try our best
- To keep ourselves and each other safe
- To always show people how good our school is
- To learn how to cope when things go wrong
- To be happy and healthy

## Appendix 6 – Post incident debrief

We will help you to feel better.

# What Hurts?

## When I feel angry.

Sometimes I feel angry.

Most of the time I can calm down. The adults in school help me to do this.

I can do some things to help myself to calm.

I can use these things to help me to calm.

<p>Playdough</p>	<p>Squeeze Roll Splat</p>
<p>Bubbles</p>	<p>Watch Blow Pop</p>
<p>Chewy/snack</p>	<p>Chew Bite</p>
<p>Stretchy band/worm</p>	<p>Pull Stretch Ping</p>
<p>Headphones/sound box</p>	<p>Quiet Listen Choose a sound</p>

Sometimes this does not work.

When I am really angry I sometimes hurt people or damage equipment. This is dangerous to me and to other people.
